

# Your tutors are online, and parents can book without texting you.

Everything you told me you needed is on one page: each tutor's photo, subjects, grade levels, hourly rate, and open hours. A parent picks a tutor, picks an hour, fills in five details, and that hour is taken.

YOUR SITE

[jahobieupskilling.github.io/jahobie-upskilling.github.io](https://jahobieupskilling.github.io/jahobie-upskilling.github.io)

# What you asked for, and where it lives

**"Photo, subjects, grade levels, hourly rate, and availability shown clearly"**

Every tutor card carries all five — plus how many hours they have open and when the next one is, so nobody has to guess.

**"Parents should know what the booking involves"**

Three plain steps near the top: one-hour sessions, no packages, nothing charged on the site. Parents pay their tutor at the session.

**"See that the tutor is appropriate for their child"**

Each profile has a short bio, how that tutor runs an hour, years of experience, languages spoken, and a background-check note.

**"Clean and friendly, with a welcoming feel"**

Warm cream and green, rounded cards, everyday language. Nothing dark, and nothing that reads like a big test-prep chain.

# How a parent books, in about a minute

1

## Find a tutor

Filter by subject, their child's grade, a day that works, and the most they want to pay per hour.

2

## Pick an open hour

They see the next two weeks. Hours already taken show as booked, so nobody picks a time that is gone.

3

## Tell you about the student

Their name and email, the child's first name and grade, and the subject they need — exactly your list.

They get a confirmation with a reference number, and the booked hour disappears from that tutor's calendar straight away. If plans change, parents can cancel from a **My bookings** section on the page, and the hour goes back up for someone else.

# What you will learn, and what is not built yet

## Which tutors people look at most

Every profile view is counted by tutor, so you can see who draws attention and who gets skipped.

## Whether visitors book or just leave

Each stage is recorded, so if people drop off you will see exactly which step lost them.

## Whether the Facebook group is working

Post the tagged link I sent you and those visits are counted separately from everyone else.

Parents' names, emails, and your students' first names are never sent to analytics. They stay in the parent's own browser.

! **Bookings do not reach your inbox yet.** They are saved on the parent's own device, so you will not be notified.

! **Some hours show as already taken** so the calendar looks realistic. Those are not real bookings.

! **Tutor photos are illustrations.** Real photos drop straight in.

## What I need from you

1. Check each tutor's subjects, grade range, rate, and days.
2. Send real photos and a line from each tutor.
3. Confirm the email address parents should use.
4. **Decide if bookings should reach your inbox** — that is the one change that makes this run the business.
